“Tom Kenyon is a channel for the Hathors, interdimensional beings who are masters of love and sound from an ascended intergalactic civilization..”

One of the most respected sound healers in the world today

Neither the voice nor the man can be explained in one paragraph or in any combination of words. He is essence of, manifestation of, emanation of . . . and his vitality, his magic and his integrity cannot be articulated in electronic swipes of ink on a papyrus of light particles captured on a computer screen. So we invite you to feel his work through what you sense reading these words and listening to the sound bites, which can no more adequately capture his voice than words can portray the man.

Tom's life studies and many lifetimes of remembrances, complete with background knowledge and experience allow him to move with equal facility between Tibetan Buddhism, Egyptian High Alchemy, Taoism and Hinduism and the sciences relative to each. A workshop or teaching experience with him leaves you empowered with a vast body of knowledge suffused with tones that awaken all the physical centers, thus allowing for greater understanding of the words and Spirit imparted.

Dendera

On the ceiling in Dendera Goddess Nut, the Goddess of the sky, who is bending herself towards the earth, with the sun disc shining on the Temple.

Mother of Osiris, Set, Isis, Nephthys and Horus.

Gregtg Braden first did this moving meditation at the Hathor Temple in Dendra on in 1996. It was channeled from the Hathors by Tom Kenyon. I have danced it at the Global Goddess Gathering several times. It creates an inter-dimensional portal!

The Hathors are a group of inter-dimensional beings who come from an ascended intergalactic civilization, many say Venus. As they once helped ancient Egypt and Tibet, they have now returned to assist humanity's current evolution.

According to Tom Kenyon
“The Hathors view us as
luminous eggs of energy
with geometry and ratio
of movement. So when
we have issues, the
subtle bodies lock or slow
and the key is to keep the
subtle bodies moving.”

During the Trazen you chant the ancient names of the elements. The elements are God/dess consciousness at a specific rate of speed. When we chant these elements our body becomes enlivened. The Essenes thought of the elements as angels and conscious beings who have agreed to create a dimension that we can evolve through.

By chanting EL KA LEEM OM
we create an interdimensional
door or vortex through which
the Hathors can enter.

- Uses mantra from ancient Egypt to denote and honor the four elements:
 - El- earth
 - Ka- fire
 - Leem- water
 - Om- air or space
