

Body Wisdom Energy Healing

Module 7

Part 2: Shrinking Tumors

Introduction

Tumors are always an indication of a long-standing energetic block that has caused an individual not to nurture themselves in some area because of a deeply rooted fear that they have been unable to confront. Usually this fear has been masked by anger so tumors almost always hold tons of anger energy. This pattern of self-hate can become so deeply embedded that it will manifest as a life-threatening disease in order to get their attention. In this situation, they are required to face this fear and remove it. Your job as a healer in this case, is bigger than just doing the energy work to shrink the tumor. Your faith and belief in the client as an individual of worth can go a long way to empower them to overcome these fears. Once confronted, the disease becomes a powerful teacher and is not seen as something to be feared, but a reminder that it is truly time to love ourselves and each other. Many who have this experience, say that it was one of the best things that ever happened to them as a person. But at the beginning of the journey, fear can be very present, both on the part of the client, as well as yourself. Building rapport with a client so that you are able to remind them of their worth, and then believing in your own worth and skill as a healer, will go a long way to empower this simple technique. Remember the words of the Master Healer, *"It will be done to you as you believe,"* and *"Your faith has made you whole."*

It is also important to remember as you embark on this journey with your client, that your idea of healing and their higher self's idea of healing may be two different things. When things like this show up, there is usually a big "heart-healing" that needs to take place. That is always going to take the front seat to any kind of physical healing. Just because their physical body may not catch up in time for them to stay on the planet, does not mean failure. Both myself and my former partner have worked on cancer patients that did not make it physically. But the healing they were able to do as a result of their disease was tremendous. When you get the call to do this work, know that Spirit is tapping you on the shoulder. It is an honor to witness what the heart can do!

This technique can be used to treat fibroid cysts, and cancerous tumors. Here's the technique:

1. Begin by doing a regular chelation, removing clouds and mucus on second and fourth levels.
2. Move to the area where the tumor is located.
3. Just like we did in organ retrieval, stabilize the area with your left hand.
4. You are going to be sending this area purple and brown energy or light. It will be important for you to do this merely by setting the intention to do so and not "thinking of the color" and "sending yellow" as we have discussed in the past. You do not want to pour energy into this area as it can actually feed the tumor (especially red or orange). Purple and brown energy is drying, shrinking energy. It will cause the tumor to shrivel up. Send this energy into the area.

5. With your left hand still stabilizing the area, remove the tumor with your right hand and hand it off to your guides and angels, or Archangel Michael.
6. Fill the area with rose light.
7. Integrate on all seven levels.
8. Chelate up from the area
9. Close as usual.
